

PRODIM

Construct Series

The Construct Series is the perfect solution for fabricators and installers. The CS machines are durable and designed to be used in tough working conditions. They are lightweight and easily carried on and off job sites. It is the true balance between performance and price.

Proliner® 7CS

The Proliner 7CS is the most compact and lightest in the range. The size and weight reduction will improve your personal working conditions, making it even more easy to transport. The Proliner 7 CS has a large touchscreen, which allows you to easily check, edit and finish your measurements on site.

Professional Dimensioning
for **Production Improvement**

Measure

- 2D/3D
- Fully portable
- No levelling and no targets required
- Integrated repositioning
- Continuous scribing
- Digitize large and small details

Software

- Measure multiple planes
- Check dimensions
- Edit drawing
- Generate CAD file (DXF)
- Tangential contour for optimal CNC use
- Additional software programs available

Hardware

- 10" screen
- Light weight (8 kg)
- Compact housing (32x32x18 cm)
- Working range of 15 m
- Precision of 0.8 mm
- Full set of accessories available

Advantages

- Eliminate mistakes
- One person operation
- Solid build and precise Prodim mechanics
- Less time on job site
- No need of physical templates
- Immediate digital output ready for production
- No need of third party computer
