JAN 31 - FEB 2, 2023  
LAS VEGAS, NV  
BOOTH 3847

## THE ALL IN ONE PROVIDER OF STONE PROCESSING SOLUTIONS

Join us in Las Vegas, Nevada January 31 - February 2, 2023 as we keep contributing to the strength and power of Industry 4.0 with the new **Intermac Master 38 CNC router**. Intermac will also power up three other machines for demonstration at the show – the **Smart 625 CNC bridge saw**, the **Montresor Vela vertical flat edge polisher** and the **Movetro storage and handling system**.

Our Master 38 CNC performs complex and varied machining operations, enabling shops that work with natural and engineered stone, granite, marble and ceramic materials to achieve superb quality finishes for bath and kitchen countertops.

You'll also see how **Easystone by DDX**, our unparalleled CAD/CAM software option, brings out the potential of the Master range. Just as impressive, learn how data collected through the intuitive dashboards of our **SOPHIA IoT platform** lets users analyze production and machine functions in detail, detect malfunctions, anticipate maintenance, avoid downtime, and order replacement parts without delay. For quality and performance, Intermac has it all.

TISE – the **ONLY** show in North America where SESA members are showing **MACHINERY**

### Featured Machines:

CNC  
Master 38

Bridge Saw  
Smart 625

Edge Polisher  
Montresor Vela 7.2

Storage/Material  
Handling System  
Movetro SA-R

Easystone  
CAD/CAM Software
